We have had an excellent business relationship with MDC Technology Group for many years. In May of this year we were in need of a new phone system, so I contacted MDC to discuss our options. Dan Crouch and Richard Kinkade came to our office to explain the newest technology available.

We decided the new voice over i.p. was the best system for our business. They installed it and we have been very pleased, excellent service and we are saving over 50% of the cost for the land lines we had previously.

I would highly recommend MDC Technology Group for phone systems and computer systems. They provide excellent products and best service around.
